

# Hedaya Hamaideh

Architect

A recent graduate with a very good (VG) average in architectural engineering from Al-Hussien Technical University. I have undertaken apprenticeship at construction industry for eight month period. These placements have allowed me to develop sector knowledge and gain hands on experience, as well as expand my understanding of the market requirement. I'm seeking for a job opportunity, where I can achieve my career goal which is to assume a role that enables me to expand my knowledge and to be an added value to the foundation.
