| **Date of birth** 26/1/1997 | **Nationality** Jordanian

PERSONAL PROFILE

A highly motivated and passionate Engineering student, aiming to use all the technical knowledge I have obtained in university and site-observation. Being in university gained me a great experience as I was part of the formula engine team, as well as the main co-founder of the sport club of HTU and the elected president for 3 years, where I was responsible to arrange all the meetings and organizing the league.

Taking advantage of being a trainee at JTI factory for Machine process improvement, as well as member of the engineering technical team.

I also have completed many courses in Lean manufacturing and management, six sigma general principle, kaizen principle and Toyota production system which I have applied in my internship.
